

# ADVANCED COURSE IN CONGENITAL ANOMALIES

15 - 16 JANUARY 2017 | DUBAI - UAE

ACCREDITED BY:

(Affiliate Education Center of JUREI, Jefferson University Hospital, PHILADELPHIA, USA)

International  
Training Center

## COURSE FACULTY

**DR. J.S. RANDHAWA, M.D.**

**Dr. Sonal Randhawa, MBBS, RDMS (USA)**

## COURSE HIGHLIGHTS

- ◆ **SCANNING TECHNIQUE FOR TARGET ANOMALY SCANS:**
  - How to focus various structures, the basic scanning protocol, developed by our own institute which prevents missing on anomalies.
- ◆ **CONGENITAL CRANIAL ANOMALIES:**
  - Differentiation between acrania, anencephaly, merocrania, hydrocephalus and ventriculomegaly, fetal brain tumors, agenesis of corpus callosum, holoprosencephaly, hydrancephaly, megalencephaly, microcephaly, porencephalic cyst, schizencephaly and arachnoid cyst. dandy walker syndrome and its variant, vein of galen aneurysm, interhemispheric cyst, clover leaf skull, strawberry skull, lemon skull, encephalocele.
- ◆ **FETAL NECK ANOMALIES:**
  - Fetal neck tumors - teratoma, Cystic hygroma and its relationship to ventriculomegaly.
- ◆ **LUNG ANOMALIES:**
  - Cystic adenomatoid malformation of lung, pulmonary sequestration, congenital high airway obstruction syndrome - CHAOS.
- ◆ **GI ANOMALIES:**
  - Esophageal atresia, duodenal atresia, jejunal atresia, colonic atresia, epigastric and medial omphalocele.
- ◆ **SPINAL ANOMALIES:**
  - Spina bifida, diastomatomelelia, spina bifida, caudal regression syndrome.
- ◆ **RENAL ANOMALIES:**
  - Fetal hydronephrosis, polycystic kidneys, multicystic kidneys. ectopic fetal kidney and fetal ureterocele.
- ◆ **BLADDER ANOMALIES:**
  - Megacystitis - Will include diagnosis of posterior urethral valves, prune-belly syndrome, urethral atresia and bilateral ureteropelvic junction obstruction, and Bladder dilatation due to vesico ureteric reflux.
- ◆ **SKELETAL ANOMALIES:**
  - Osteogenesis imperfecta, achondroplasia, arthrogyprosis, club foot, rocker bottom foot, thanotrophic dysplasia, cleft lip and palate.
- ◆ **MISCELLANEOUS:**
  - Saccrococcygeal teratoma and other fetal tumors, persistent rt umbilical vein, fetal gall stones and visceral situs, meconium peritonitis, echogenic bowel, meckel gruber syndrome, fetal ovarian cyst. oeis complex - omphalocele, exstrophy bladder or cloacal, imperforate anus includes diagnosis of exstrophy and imperforate anus and differential between omphalocele and gastrochisis. Ultrasound diagnosis - fetal ascites, pleural effusion and pericardial effusion.

- ◆ **ALL ANOMALIES CASE DISCUSSIONS WITH VIDEO PRESENTATIONS**
